The portable non-invasive solution for efficient liver disease management
The portable non-invasive solution for efficient liver disease management

Adaptive design and ergonomics: from cart-based to transportable

Powered by

**LSM** by VCTE™
Liver Fibrosis
LSM by VCTE™ is unique, patented and validated for liver fibrosis assessment.
- It is the standard for non-invasive evaluation of liver stiffness.¹
- 2,250 peer-reviewed publications support the use of LSM by VCTE™.

**CAP™**
Liver Steatosis
CAP™ is unique, patented and validated for liver steatosis assessment.
- 330 international and peer-reviewed articles support the use of CAP™.

What makes FibroScan® unique?

**Fast**
A painless exam performed in less than 10 minutes to provide immediate results at the point-of-care.

**Intuitive**
Can be performed by any trained operator (physician, nurse).

**Best in Class**
The non-invasive gold standard solution validated by >600+ peer-reviewed publications and >100 international guidelines.

**Reliable**
Standardized examination with exceptional precision and reproducibility that can be utilized in 99% of patients.²³

**Original**
Equipped with patented technology and proprietary algorithms to deliver consistently accurate results.

When evidence matters and consistency counts

- Pioneer in the field of liver elastography
- FibroScan® produces biomarkers that can assess and monitor patients over time
- FibroScan® uses uniform algorithms that minimize inter-operator variability in all FibroScan® devices used in a medical facility
- FibroScan® uses sophisticated software for uniform and high-quality analysis, enabling millions of liver examinations
- Winner of the Red Dot Design Award (FibroScan® 430 Mini+ model)

*LSM: Liver Stiffness Measurement.

² Liver Steatosis
³***CAP**: Computerized Axial Portomeasurement

Products in the FibroScan® range are Class IIa medical devices as defined by Directive 93/42/EEC (EC 0459). These devices are designed for use in a medical practice in order to measure liver stiffness and ultrasound attenuation in patients with liver disease. Examinations with FibroScan® device shall be performed by an operator who has been certified by the manufacturer or its approved local representative. Operators are expressly recommended to carefully read the instructions given in the user manual and on the labelling of these products. Check cost defrayal conditions with paying bodies.
